**MARINE**

**OFF-ROAD & HEAVY VEHICLES**

Your leading global partner for reliable, highly sophisticated embedded products used in regulated critical applications

# ABOUT duagon

## Your leading global partner for reliable, highly sophisticated embedded products used in regulated critical applications

duagon, a swiss based company powered by the strong brands duagon, MEN and OEM, is a leading supplier for communication, computing and control technology for regulated critical applications in the railway and embedded electronics market. Our superior software and hardware IP create highly reliable, innovative, safe and rugged products, enabling customers to shape and realize their technology roadmap. duagon – leading the embedded future.

### COMMUNICATION TECHNOLOGY

Communication and control solutions for railway and transportation

### RUGGED EMBEDDED COMPUTING

Rugged embedded computers for mission-critical applications in harsh industrial environments

### CONTROL & MONITORING

Control, monitoring and information systems for railway and transportation

## Everything from one single source

The operational business of duagon is comprised of two segments, Communication & Control and Computing. The business units work closely together with a common aim: to provide all customers with comprehensive solutions from one single source.

# BUSINESS UNITS & PRODUCTS

## COMMUNICATION & CONTROL

**Communication technology by duagon.** As technology leader in the field of communication solutions duagon offers the most comprehensive product portfolio for train networks using MVB, real-time Ethernet (CIP, IPTCom, TRDP, PROFINET, and more), WTB and CAN. In addition to the wide range of communication interfaces, duagon offers gateways, repeaters, switches and diagnostic tools.

**Control and monitoring solutions by OEM.** As a leading provider of railway and transportation control, monitoring and information systems, OEM offers solutions for a range of essential sub-systems, such as condition-based monitoring and maintenance, air conditioning, door control and powerpack.
Furthermore, OEM helps customers to connect devices, processes and systems through the OEM Cloud.

## COMPUTING

**Ruggedand reliable embedded computer systems by MEN.** Focused on innovation, reliability and flexibility, MEN develops and manufactures highly reliable systems from low-power to high-performance applications.
MEN offers a robust range of embedded COTS boards and devices widely used in extreme environmental conditions found in mobile, industrial and safety-critical applications.

# YOUR ADVANTAGES

### CORE COMPETENCIES
Broad-ranging competencies covering software development, hardware and FPGA design, basic integrity to SIL 4.

### RELIABLE PARTNER
Stable long-term partner with strong reputation. Successful business with more than 20 years' experience.

**20+**

### DEDICATED PEOPLE
Over 170 dedicated engineers for product development and maintenance. More than 450 employees.

**170+**

### GLOBAL SUPPORT
Fast and competent service and support from Australia, China, France, Germany, India, Switzerland and USA.

# duagon worldwide

duagon has a global presence with support and sales representatives across 7 countries. With three decentralized engineering and production sites, our customers take advantage of the added competence and flexibility.
